What is Managed Environments?

Power Platform Managed Environments

Scale up trust, transparency, and governance across all your low code solutions

More visibility

Gain a birds-eye view of your organization's low code adoption with advanced monitoring and analytics.

More control

Tailor permissions, policies, and automations to your organization's needs. Manage your low code assets at scale for greater efficiency, trust, and peace of mind.

Less effort

Smart recommendations make it easy to enhance your low-code deployment step-by-step.

Managed Environments Features

How to enable managed environments

Demo

Limit sharing of canvas apps

Sharing rules available*:

- Don't set limits
- Exclude sharing with security groups
- Limit total users who can be shared to

Limit sharing
Help reduce risk by limiting how widely canvas apps can be shared. [Learn more](#)

☒ Don't set limits

☐ Exclude sharing with security groups

☐ Limit total individuals who can be shared to

No limit

*Applying sharing rules will not change who an app has already been shared with.

Share Play with Sharing

Add people as Users and Co-owners to your app. Make sure your data connections have been shared with all users.

Apps in this environment cannot be shared with security groups or more than 3 users.

This user can use this app.

☐ Co-owner

Can use, edit, share app but not delete or change owner.

Data permissions

Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and tables.

View Data Policies

A filtered view to display the data policies applied to a managed environment

The screenshot displays the Power Platform admin center interface. On the left is a navigation pane with links to Home, Environments, Analytics, Resources, Help + support, Data integration, Data (preview), and Policies. The 'Data policies' link is selected. The main content area shows a '+ New Policy' button, a 'Data policies' heading, and instructions to create and manage connector policies. It also indicates that policies are applied to the 'DemoEnvironment' environment, with a 'Clear filters' link. Below this is a table listing two data policies: DLP2 and DLP1. Both policies are applied to 'Org (tenant)' and 'All environments', created by the 'System Administrator' on 5/31/2022 and 4/11/2022 respectively, and both were last modified on 6/7/2022.

Name	Scope	Applied to	Created by	Created	Modified by	Modified
DLP2	Org (tenant)	All environments	System Administrator	5/31/2022	System Administrator	6/7/2022
DLP1	Org (tenant)	All environments	System Administrator	4/11/2022	System Administrator	6/7/2022

Licensing

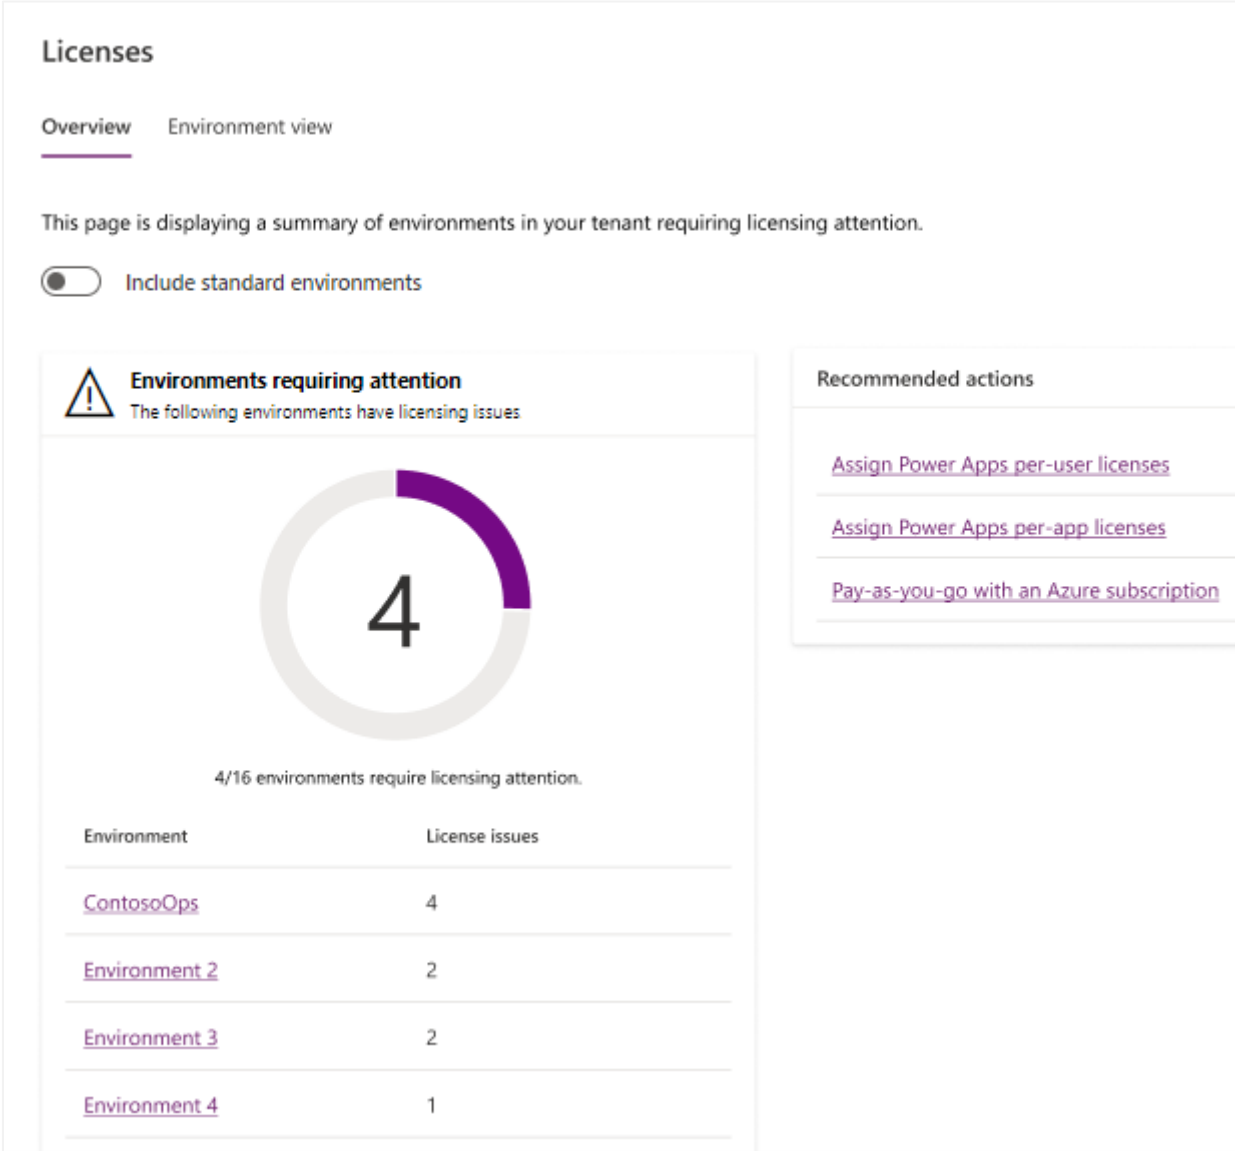

Licensing

When Managed Environments are activated in an environment, every app, flow, bot, and Power Pages website in that environment requires **standalone licenses** for access.
